SUMMARY

Fullstack Web Developer and Information Technology student (GPA: 3.8/4.00) specializing in modern web development across frontend (Vue.js, React, Next.js) and backend (PHP, Laravel) ecosystems. Proven track record delivering production-grade systems, including a public village information platform for Ngemplak Kalangan, Trimulyo. Experienced in Git-based collaborative workflows, and self-driven exploration of Machine Learning and Mobile Development through independent projects. Strong learner with a track record of translating real-world requirements into functional, scalable web solutions.

EDUCATION

Bachelor of Information Technology

State University of Yogyakarta

08/2023 – Present

Sleman, Yogyakarta

Cumulative GPA: 3.8 / 4.00 (High Distinction)

- **Relevant Coursework:** Web Programming, Database Systems, Algorithm & Data Structures, Software Engineering, Machine Learning.
- Active member of **INFINITE UNY**.

CERTIFICATE

INFINITE x GDSC UNY Learning Path: Study Camp 2024 — Hacker Path

UKM Rekayasa Teknologi UNY & Google Developer Student Clubs UNY

02/2024 – 03/2024

Sleman, Yogyakarta

- **Completed an intensive technical learning path** covering Computational Thinking, Data Structures & Algorithms, C, Python, Flask, HTML5, CSS3, JavaScript (DOM Manipulation & Event Handling), and GitHub workflows.
- **Demonstrated** practical application through case studies in web development and algorithmic problem solving.

ORGANIZATIONS

INFINITE UNY

Member

11/2024 – 11/2025

Sleman, Yogyakarta

- **Contributed to a specialized IT division** under UKM Rekayasa Teknologi UNY focusing on web development and software engineering.
- **Upskilled in full-stack web development methodologies**, participating in collaborative code bases and version-controlled environments using Git and GitHub.
- **Competed in Pekan IT UNSIKA** by developing 'BetBlock', a Chrome extension engineered to block online gambling content on piracy streaming websites.

Student Representative Council (MPK) — SMA Negeri 1 Pengasih

Staff of Documentation Division

PROJECTS

Laboratory Inventory Information System — DPTEI UNY

Fullstack Web Developer | Final Practicum Project

04/2026 – 05/2026

Sleman, Yogyakarta

- **Engineered a multi-tenant laboratory inventory system** to streamline equipment tracking, borrowing workflows, returns, and stock opname across multiple department labs.
- **Implemented role-based access control** and **header-detail database schemas** for efficient multi-item transaction management.

- **Tech Stack:** Laravel, PHP, JavaScript, Blade, Tailwind CSS, MySQL.

Ngemplak Kalangan Village Website

Fullstack Web Developer | Community Service (KKN) Project

07/2026 – 09/2026
Trimulyo, Sleman

- **Developed and deployed** the official public portal and administrative information system for **Ngemplak Kalangan Village** to enhance local governance and public service accessibility.
- **Integrated dynamic content management** for local announcements, community profile branding, and village potential.
- **Tech Stack:** Laravel, PHP, Vue.js, JavaScript, Tailwind CSS, MySQL.

Book Grant UNY API — Reviewer Module

Backend Developer | Academic API Project

04/2026 – 05/2026
Sleman, Yogyakarta

- **Built and optimized** the reviewer module for the university book grant application system RESTful API.
- **Developed backend logic** for evaluator assignment, scoring workflows, and structured submission review management.
- **Tech Stack:** Laravel, PHP, RESTful API, MySQL.

BetBlock Chrome Extension

Browser Extension Developer | Pekan IT UNSIKA Competition Project

10/2024 – 11/2024
Sleman, Yogyakarta

- **Developed a custom Manifest V3 Chrome extension** designed to detect and block intrusive online gambling content and scripts on piracy streaming websites.
- **Represented Team INFINITE UNY** in the **Pekan IT UNSIKA national competition 2024** with a focus on web safety and content filtering.
- **Tech Stack:** JavaScript, HTML5/CSS3, Chrome Extension API (Manifest V3), Git.

SKILLS

Web Development & Frameworks

Laravel, PHP, Tailwind CSS, MySQL, Python (Streamlit/Basic ML), Flask, JavaScript, Java, React, Vue, Next

Tools & Infrastructure

Git & GitHub, VS Code, Web Deployment (Shared Hosting/hPanel), cPanel, n8n

Design & Multimedia

Figma, Canva, Video Editing, OBS Studio (Streaming Management)

Collaboration & Soft Skills

Team Collaboration, Problem Solving, Adaptive Learning.
